## Profile Summary

**Full Stack Software Engineer** with hands-on experience building scalable web applications using **React.js, Node.js, Express.js, and MongoDB**. Experienced in designing **database schemas**, developing **RESTful APIs**, implementing **authentication systems**, and integrating frontend applications with backend services. Skilled in **state management**, API integration, and building responsive user interfaces with modern JavaScript technologies. Currently exploring **Generative AI** and **Retrieval-Augmented Generation (RAG)**.

## Technical Skills

**Programming Languages:** JavaScript (ES6+), C++, Python

**Frontend Technologies:** HTML, CSS, SCSS, Tailwind CSS, React.js, Next.js, Shadcn UI, Material UI, Redux Toolkit, Axios, Context APIs

**Backend Development:** Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture

**Dev Tools:** Git/GitHub, Render, Vercel, Netlify, Postman, GitHub Actions

**Database Management:** MongoDB, Firebase, Supabase.

**Core Concepts:** Data Structures & Algorithms, RESTful APIs, Object-Oriented Programming, CRUD Operations

## Work Experience

### Full Stack Developer Intern

**Tekonika Technologies** • Gurugram, India (Hybrid)

Aug 2025 – Nov 2025

- **Built Login and Signup** modules for the company's recruitment platform using **React.js**, implementing responsive layouts, form validation, and authentication workflows.
- Documented **20+ defects** with clear reproduction steps and collaborated with developers to prioritize, track, and verify bug resolutions using Jira across multiple release cycles.
- Conducted **regression testing** after **15+ feature enhancements** to ensure existing functionalities remained stable across multiple application modules and critical user workflows.
- Identified and fixed **20+ content and UI issues** across the **News and Blogs modules, including broken URLs, HTML tag errors, incorrect links, and content mismatches.**
- Tested and validated **3+ API endpoints** to ensure blogs and related resources were mapped to the correct endpoints and functioning as expected.

## Key Projects

### PerplexityClone (AI Search & Chat Application)

- Created a full stack AI-powered search and chat application by integrating **2 LLMs with real-time internet search** capabilities and secure **JWT-based authentication**.
  - Designed a scalable MERN backend comprising **10+ RESTful API** endpoints for AI conversations, model switching, email verification, and Generative AI workflows.
  - **Technologies:** React.js, Redux Toolkit, Tailwind CSS, React Router, Axios, Node.js, Express.js, MongoDB, JWT Authentication, Google Gemini API, Mistral AI API, Tavily Search API, Gmail API, Google OAuth 2.0, RESTful APIs, Vite, Cookie Parser, CORS, Morgan, Render
- [GitHub Link](#) | [Website Link](#)

### SnitchClone (E-commerce Platform)

- Architected a fashion e-commerce platform inspired by Snitch with secure **JWT authentication, Google OAuth**, and role based access control for buyers and sellers.
  - This is a scalable MERN architecture comprising **15+ RESTful API** endpoints for authentication, product management, product variants and seller dashboard functionality. Also implemented secure image uploads, protected routes and state management.
  - **Technologies:** React.js, Redux Toolkit, Axios, Tailwind CSS, React Router, MVC Architecture, Node.js, Express.js, MongoDB, CRUD Operations, JWT Authentication, Google OAuth 2.0, RESTful APIs, Vite, Cookie Parser, CORS, Multer, ImageKit, Render
- [GitHub Link](#) | [Website Link](#)

### UberClone (Ride Booking Web App)

- Engineered role-based authentication that can manage 100+ concurrent user-driver sessions in real time.
- Integrated secure RESTful APIs, improving latency by 40% with optimized middleware design.
- **Technologies:** React.js, Tailwind CSS, Node.js, Express.js, JWT, MongoDB | [GitHub Link](#)

## Education

### Bachelor of Technology in Computer Science

**Parul University** • Vadodara, Gujarat, India

2021 – 2025

### Higher Secondary School

**St Paul's High School** • Hajipur, Bihar, India

2019 – 2021

## Certifications & Achievements

- **Certifications:** Data Structures & Algorithm with C++ | Solved 200+ problems from CodeStudio | [Link](#)
- **Achievements:** Earned 20+ DSA badges on CodeStudio
- **NPTEL Certifications:** Data Analytics with Python | [Link](#)
